PROJECTS

- **ContactKeeper:** Full-stack application using React, Node, Express, and MongoDB to allow users to create an account, validate and authenticate logins, and store and search custom created contacts using full CRUD commands.
Deployment: <https://contactkeeper-react-app.herokuapp.com/>
Repo: <https://github.com/Brian-Holland/Contact-Keeper>
- **GitHub Finder:** Responsive React application utilizing the GitHub API to search for GitHub user information and displays the API response in a custom profile component.
Deployment: <https://github-find-app.netlify.app>
Repo: <https://github.com/Brian-Holland/Github-Finder>
- **Magic 8 Ball:** Classic Magic 8-Ball created using React. Users can ask a question and/or shake the ball to trigger a shaking animation and a slow fade in of one of the original 20 predictions inside the ball.
Deployment: <https://www.askthemagic8ball.com>
Repo: https://github.com/Brian-Holland/React_Magic_8_Ball_Hooks
